

DATE PREPARED: 16 May 1984

FROM: Commanding Officer, Marine Corps Air Station (Helicopter), New River, NC

TO: COMMANDANT OF THE MARINE CORPS (CODE LFF)

NOMENCLATURE	CATEGORY CODE	UNIT OF MEASURE	SPECIFIC AREA
AIRCRAFT WASHRACK PAVEMENT	116-10	SY	LA

DETERMINATION OF REQUIREMENTS: (If additional space is needed, use plain sheet of paper)

Source Document: NAVFAC P-80

NAVFAC P-80 indicates one type "A" washrack for each 40 rotary wing aircraft.

Because of extensive over water training requirements NAVAIR corrosion control guidance requires each aircraft to be washed a minimum of once every two weeks. This totals approximately 400 washes at New River per month. Based on 20 work-days per month and 4 hours per aircraft, a requirement exists for 10 type "A" washracks or the capability of washing more than one aircraft at a time on each washrack.

DATE PREPARED: 1 Jun 1975

FROM: Commanding Officer, MCAS(H) New River

TO: COMMANDANT OF THE MARINE CORPS (CODE LFF)

NOMENCLATURE	CATEGORY CODE	UNIT OF MEASURE	SPECIFIC AREA
Aircraft Rinse Facility	116-15	SY	LA
DETERMINATION OF REQUIREMENTS: (If additional space is needed, use plain sheet of paper)			

An aircraft rinse facility provides an unattended taxi-through, treadle-operated, fresh water deluge system to rinse aircraft. The aircraft rinse facility is required at an air installation having aircraft subject to accelerated corrosion due to low-level overwater operations or a corrosive atmosphere at the installation. The requirement is for one Type-1 (910 SY) rinse facility for rotary wing aircraft.

1998 - CHANGE to Type 4 for MV-22 AIRCRAFT
due in FY00.
